

1080 Standard Operating Procedures - Template

How to use this template

A Standard Operating Procedure (SOP) for use of 1080 concentrate and subsequent approval through Chemical Services is one of the essential requirements before a 1080 Bait Injection Authorisation can be issued.

The Department of Agriculture and Fisheries (DAF) has produced the Model Standard Operating Procedure for preparation of 1080 wild dog baits which is available on the Chemical Services website: [NT.GOV.AU](https://www.nt.gov.au/chemical-services/). This template, in conjunction with the 1080 bait injection training course notes, can be used to help you develop your personalised SOP. Your personalised SOP is required to ensure that you follow procedures that result in safe and responsible handling of 1080 concentrate.

This personalised SOP shall not contravene any of the following:

- Instructions on the registered chemical product label,
- APVMA permit number PER8781 (Supplying A Perishable Bait Treated With a Registered Chemical Product),
- Direction for use of 1080 for wild dog control issued by DITT,
- Conditions prescribed on a 1080 Bait Injection Authorisation when issued, or
- Any conditions as prescribed on a Pest Animal Management Authorisation and Permit when issued.

Any of the material in the guideline for the development of a SOP for wild dog baiting, particularly the checklists as provided in Section 19 - Attachments 3, 4 and 5, can be referenced, extracted and utilised to develop your SOP.

The following aspects must be covered in your personalised SOP:

Full Name of 1080 Bait Injector:

Bait Injector Authorisation No:

1080BIA/

1. Safety equipment and precautions

(Must include information on your Personal Protective Equipment [PPE])

2. Maintenance and calibration of injecting equipment
3. Preparation of freshly cured wet meat baits
4. Transport and storage of 1080 concentrate
5. Storage and distribution of prepared wet and dry baits

6. Checklists

(For activities that need to be carried out before, during and after bait preparation. Attach these to the end of your SOP)

7. Record keeping

Note: records must be kept for at least two years and in accordance with section 19 of the Control of Use Act
