

## PASTORAL LAND BOARD

*Pastoral Land Act – section 38(1)(h)*

### CONSENT TO CLEAR PASTORAL LAND

**PERMIT NUMBER: PLC08/2**

#### DESCRIPTION OF LAND THE SUBJECT OF THE PERMIT

Station Name: East Mathison  
Pastoral Lease No: PPL 1039  
NT Portion: 3991  
Pastoral District: Katherine Pastoral District

#### DETAILS OF APPROVED CLEARING

The Pastoral Land Board on 4 September 2008 granted consent to the clearing of approximately 1613 hectares in accordance with the attached schedule of conditions and the endorsed clearing plan Drawing No. 08/1039/1 sheets 1 – 11.

#### REASONS FOR DECISION

1. The application lodged on 15 April 2008 sought approval to clear a total of 2380 ha. The Board resolved to amend the application to:
  - i. include a 100m wide buffer of native vegetation between the proposed clearing and a 12 metre wide fire break along the boundary with Dry River Station (NT Portion 2977)
  - ii. include areas identified as being unsuitable for clearing within wildlife corridors as outlined on the approved clearing plan; and
  - iii. retain a linear strip of native vegetation in the northeast of Paddock A as shown on the approved clearing plan.
2. The application as amended is in accordance with the NT Land Clearing Guidelines.
3. Soil types in the areas approved for clearing are suitable for clearing and pastoral land use.
4. The property management plan addresses relevant resource management issues.

#### PERIOD OF THE PERMIT

This permit will lapse if clearing has not commenced within 3 years and/or has not been completed within 5 years of the date of this permit; and the lessee will need to seek an extension of time from the Pastoral Land Board to complete the clearing.

#### APPEAL

Under section 119 of the *Pastoral Land Act*, a pastoral lessee who is dissatisfied with a decision of the Pastoral Land Board may appeal to the Pastoral Land Appeal Tribunal against the decision of the Board. Appeals may be lodged with the Registrar of the Appeal Tribunal within 28 days of notification of the decision of the Board.

A D Young  
Chairman  
Pastoral Land Board

## CONSENT TO CLEAR PASTORAL LAND

### PERMIT NUMBER: PLC08/2 SCHEDULE OF CONDITIONS

1. Clearing carried out under this permit shall be in accordance with drawing number 08/1039/1 sheets 1 – 11 endorsed as forming part of this permit, to the satisfaction of the Chairman, Pastoral Land Board.
2. All clearing is to be carried out on the contour.
3. Areas of rock outcrops and stone arrangements are not to be cleared and are to be avoided during clearing procedures and any construction works carried out.
4. Clearing and ongoing resource management shall be in accordance with the Property Management Plan for Land Clearing Development endorsed as forming part of this permit, to the satisfaction of the Chairman, Pastoral Land Board.
5. The Director Rangelands Management Branch, Department of Natural Resources, Environment and the Arts is to be notified before the commencement of clearing and on completion of the clearing development.

#### NOTES

1. The Aboriginal Areas Protection Authority recommends that the pastoral lessee obtain an Authority Certificate to indemnify against prosecution under the *Aboriginal Sacred Sites Act 1989*.
2. The permit holder is advised that there are statutory obligations under *the Weeds Management Act 2001* to take all practical measures to manage weeds on the property. For advice on weed management please contact the Regional Weeds Officer, Natural Resources, Environment and the Arts on telephone 8973 8107.
3. Fire prevention measures are to be implemented in accordance with the requirements of the *Bushfires Act*. Permits must be obtained from the Regional Fire Control Officer of the Department of Natural Resources, Environment and the Arts (telephone 8973 8871) before ignition of any felled timber in this area.
4. The *Heritage Conservation Act 1991* protects archaeological places and objects, regardless of the level of documentation that the Office of Environment and Heritage has of such sites. It is an offence to undertake work on a place or object without the consent of the Minister for Environment and Heritage.
5. It is the responsibility of the pastoral lessee to refer the proposed development to the Commonwealth Department of the Environment and Heritage under the *Environment Protection and Biodiversity Conservation Act* should they believe the proposed development may have a significant impact on a matter of national environmental significance as outlined in that legislation.

A D Young  
Chairman  
Pastoral Land Board

This is the Property Management Plan for Land Clearing Development referred to in Pastoral Land Clearing Permit No. PLC08/2 issued on 12/9/2008

CHAIRMAN  
PASTORAL LAND BOARD

## NORTHERN TERRITORY PASTORAL LAND BOARD

# Property Management Plan for Land Clearing Development

## Pastoral Lease No: 1039 East Mathison Station

### 1. Overview of Proposed Clearing & Whole Property Development

#### **Summary of clearing & development program for the whole property.**

Since the purchase of East Mathison in July 07, we have identified an area on the eastern boundary next to Dry River Station for development of weaner and bull paddocks.

These holding paddocks will assist in the processing of weaners and breeders on this eastern side of the property and will assist in bull segregation and reduce the requirement for the importation of hay which may be contaminated with weeds.

This area also has access to the nearby Dry River Loop Road.

#### **Details of the natural resources (native vegetation and pasture, soils, waters, average rainfall) and current status (is native vegetation stable, current land condition and weed status).**

**Soils** The area to be cleared is mainly of the Banjo Land System comprising of mainly red soils, with outcrops of red gravelly soil.

**Vegetation** The area to be cleared has an upper story, consisting of Eucalyptus and Ironwood trees, with areas of wattle and snappy gum over grass layers of kangaroo grass and white grass.

**Water** In this area to be cleared, there is no natural watercourses. This area will be watered by proposed bores and poly pipe.

**Rainfall** 800 ml average

**Weeds** In the area to be cleared, there are no known weeds. The only known outcrops of weeds are near water points on the Victoria Highway and around Cridlands Bore, all of which have been sprayed this past wet season. There is also a small amount of mimosa at Pelican Hole that has had Graslan applied prior to the 2007/08 wet season

## How does the proposed clearing development fit into the long term aims for the property?

Our long term aim for this property is to supply short term grazing areas near the yards, for the mustering season, nutritious pastures for weaners so as to avoid hay purchases and an area for bull segregation. The pastures will also provide feed for animals awaiting shipment.

## Number of cattle currently carried and proposed final number of cattle to be carried on the property following completion of the clearing development.

The proposed project is not designed to increase carrying capacity. It is designed to provide seasonal high quality grazing for weaners and turnoff cattle and reduce supplementary feeding and importation of hay.

## 2. Cost and Benefit of Development

### Cost of the proposed clearing development; total, per ha or km2.

#### Clearing Project Budget

Establishment Cost	Cost
<b>Bull Dozer</b>	
1613 ha @ 3 ha/.hr @ \$150/hr	\$80,650
Plough 1613 ha @ 3ha/hr @ \$90/hr	\$48,390
<b>Pasture Seed "Northern Tropical Mix"</b>	
1613 ha @ 7kg/ha @ \$15/kg	\$169,365
<b>Fertilizer</b>	
Nitrogen 100kg/ha @ \$500/Tonne	\$80,650
<b>Fuel &amp; Labour</b>	
Apply fertilizer and seed \$10/ha	\$16,130
Total Project Cost	\$395,185

### Annual cost of ongoing maintenance following completion of the clearing development per ha or km2.

#### Maintenance Cost

<b>Fertilizer Bi-annually</b>	
Superphosphate 100kg/ha @ \$500/Tonne	\$80,650
<b>Regrowth Control Annually</b>	
100Lt Access & Diesel	\$ 7,000
	\$87,650

**Projected increase in carrying capacity following completion of the clearing development (per km<sup>2</sup> and total for the clearing project).**

The proposed project is not designed to increase carrying capacity. It is designed to provide seasonal high quality grazing and reduce supplementary feeding and importation of hay.

**Projected increased annual income from the clearing development; per ha or km<sup>2</sup>.**

It is not possible to project an annual income from the development as the benefits are hard to value in purely financial terms. However, increased productivity and cost savings will come from a safer, more efficient, cattle handling system, better animal husbandry for weaners, and will avoid buying hay from areas which may be affected by weeds.

### **3. Details of Proposed Clearing**

**Areas not to be cleared due to natural resource limitations (slope, rock outcrop, seasonal inundation, poor soils, highly erodible soils, watercourse and drainage line buffers and native vegetation strips to be retained for soil and drainage management).**

The area has less than 2% slope and there are no rocky outcrops expected in the development area and would certainly be avoided. There is no riparian area in the proposed clearing area.

**Areas not to be cleared due to environmental and heritage considerations identified in Section II on the application form. Areas to be retained for wildlife corridors.**

There are no known environmental or heritage areas in this proposed clearing area. There will be 150 m wildlife corridors as per the attached map.

**Details of clearing method, technique & timing of each stage (eg chaining, windrowing, raking, burning, pin wheel rake, site preparation).**

- Clearing will be carried out with 2 D6 size bulldozers equipped with a stick rake. Clearing will initially be done when moisture is suitable for adequate chaining. Material will be raked and stacked in wind rows.
- Clearing will take place when weather permits to prevent snapping.
- Burning will take place when weather permits after wind rowing.
- The area will be ploughed with offset discs and planted the wet season following initial clearing.

#### **Details of waterway establishment, graded banks and other earthworks for run off management and infrastructure development.**

Clearing operations will not be carried out within 100 m of watercourses or where slope exceeds 2%. The proposed sites has been selected to meet these criteria. There is suitable machinery stationed on the property or contractors in the area, to deal with any soil conservation measures if they should occur i.e. Dozers, Graders, Loaders etc.

#### **Details of pasture establishment and development methods (species, sowing rates, sowing methods, fertiliser regimes).**

After initial clearing operations, the area will be ploughed, fertilized and sown the wet season following initial clearing.

Pasture species to be sown will be Jarrah, Rhodes and Sabi combined with Verano and Seca Stylo. These seeds are commercially available as Northern Tropical Mix which has a recommended sowing rate of 7 kg/ha. 100-150 kg/ha of fertilizer will be mixed with the seed and distributed with a fertilizer spreader and dragged over.

Follow up applications of superphosphate will be applied annually at 100-150 kg/ha.

## **4. Ongoing Resource Management**

#### **Grazing regimes and pasture management plan (periods of stocking, stocking rates, spelling, fertiliser and woody regrowth management)**

Wet season spelling and dry season grazing. Stocking rates will be determined by the amount of feed available. It is envisaged that a utilization rate of 30% is sustainable. Superphosphate and nitrogen fertilizers will be applied annually at a rate of 100-150 kg/ha.

#### **Weed Management Plan (to include weed species present, area of weeds, areas at risk, control measures proposed, including measures to prevent new weed infestations)**

The area is currently weed free. All seed to be used in the project will be purchased certified weed free. Monitoring of pasture and cattle condition will detect any weeds that may emerge during the growing season, facilitating their removal before becoming established. Eliminating the threat of weeds becoming established is one of the objects of this proposal.

#### **Exotic Pasture Species Management Plan (to include details of exotic pasture species and areas planted. Buffer zones around exotic pasture species, location of watercourses, measures proposed to prevent spread to non target areas, grazing systems, location of fences & watering points)**

It is our experience that these exotic pasture species do not survive wet season grazing and do not survive very well without fertilixer, so we do not envisage their being any spread in native pasture.

**Fire Management Plan (use of fire for management and protection from wildfires.**

Firebreaks will be established around the paddocks and will be annually maintained. Burning is not part of the planned management program.

**Native Vegetation Management Plan (prevention of degradation to remaining native vegetation, including native vegetation buffers).**

There are no plans to extend the current areas; native trees are required to provide shade and shelter for livestock.

**Erosion and Sediment Control Plan (erosion prevention and strategies for rehabilitation if erosion occurs.**

Due to slight slope (less than 2%), we do not envisage erosion occurring. However, Whoa Boys will be constructed on fencelines.

If erosion were to occur, we have adequate machinery based on the station or contractors in the area to carry out remedial soil conservation works if required.

**Feral Animal Management Plan**

The area is free of feral animals.
