

Help save our bacon

African swine fever is a contagious disease that's spreading rapidly and will devastate our pork industry if it gets into Australia. You can help by not feeding pigs swill. Swill is food or food scraps containing meat, meat products, eggs or has had contact with meat products. Swill feeding is illegal.

Don't feed swill to pigs. Keep them vegetarian.

If it looks suss, call us 1800 675 888.
