

ALTERNATIVE ENERGY AND CARAVAN PARK CONCESSION FORM

Alternative Energy and Caravan Park

Members of the NT Concession Scheme who live off-grid and produce their own electricity from a Generator, Solar System or who reside in a Caravan Park may be entitled to receive a concession. The concession is based on a fixed daily rate regardless of the size of the Generator/Solar System or the amount of electricity generated/used. The concession is paid after the cost has been incurred and following the completion and lodgement of this form and supporting documentation/receipts.

What Alternative Energy Sources are included?

Alternative Energy sources include diesel fuel, unleaded fuel, LP Gas, Kerosene and Deep Cycle Batteries for solar systems and electricity provided through a Caravan Park.

Who can Receive Alternative Energy Concessions?

Concessions are available to eligible NT Concession Scheme members who:

- Are **not** connected to the grid, e.g. receive an electricity bill from Jacana Energy
- Incur costs associated with the supply of electricity (Generator/Solar System)
- Reside in a Caravan Park and electricity is supplied by the Park
- Can provide evidence of expenditure e.g. dated fuel/caravan park receipts including members name or evidence where a deep cycle solar battery is used
- Has an approved eligibility status under the NT Concession Scheme for the period in which the fuel receipts are provided
- Generates the power for their own domestic consumption
- Do not receive concessions for electricity supply by other means.

What is the concession amount?

The concession amount is published on the NT Concession website and is based on a fixed daily rate. The amount of concession paid cannot exceed the value of energy source purchased. For example the concession paid cannot exceed the value of the fuel purchased for a generator or amount paid to a caravan park service provider.

Are there any exclusions?

Alternative Energy Concessions are not available:

- to companies, businesses and organisations
- to members who receive rebates from other sources, i.e. the Australia Taxation Office
- if another eligible NT Concession Scheme member has claimed a concessions for the same residence, for the same period
- for Solar Systems that generate credits and return electricity to the Grid.

How can the concession be claimed?

Members must complete and submit Alternate Energy and Caravan Park Concession form providing the following information:

- Members details
- Tax invoice/s and receipts confirming electricity costs for the period claimed
