

# Lumpy Skin Disease

## Northern Territory Lumpy Skin Disease (LSD) Preparedness Action Plan

- Formation of Northern Territory LSD Stakeholder Group to lead Preparedness Actions
- Foster established relationships with northern neighbours to provide technical laboratory expertise and support
- Establish Biosecurity Exchange Program with Indonesian partners to develop professional collaborations
- Targeted LSD Information Campaign for the northern Stakeholders
- Enhanced Surveillance Strategy for LSD
- Enhanced Vector Surveillance for LSD
- Partner with Indigenous landowners to deliver LSD Focus Actions on Aboriginal Lands
- Activation of Northern Australian Biosecurity Surveillance (NABS) Veterinary Network for LSD early detection
- Formation of NABS Producer Network, and co-ordinated training for producer sampling for LSD early detection
- Development of Northern Territory LSD Response Plan using Australia's Veterinary Emergency Plan (AUSVETPLAN) for LSD
- Develop and exercise Industry LSD Activation Plan
- Actively participate in national actions to enhance LSD laboratory diagnostic capability and effective disease control measures
- Support Australia's national LSD plan
