

BUFFEL GRASS ACTION PROGRAM

PREVENTING SPREAD

Work to minimise the spread of buffel grass and reduce the risk of new infestations establishing in priority areas, with a focus on transport corridors and other high-risk pathways.

PROTECTING PRIORITY ENVIRONMENTAL AND CULTURAL ASSETS

Work with land managers and Traditional Owners to protect priority environmental and cultural assets, with a focus on conservation areas.

COORDINATION AND STRATEGIC PLANNING

Provide strategic leadership and coordination of buffel grass management across the Northern Territory and with other jurisdictions.

Lead and support the implementation of the Buffel Grass Weed Management Plan 2026-2036 and the Buffel Grass Management Strategy: Central Australia 2024-2030.

BUILDING CAPACITY AND SUPPORTING LAND MANAGERS

Increase community awareness of buffel grass impacts and management through targeted community engagement and extension.

Support land managers through training, technical advice, mapping, planning assistance, herbicide access and equipment loans.

MONITORING, EVALUATION AND RESEARCH

Improve understanding of buffel grass distribution, impacts and management through monitoring, evaluation and targeted research.

**Building capacity,
reducing impacts and
minimising further spread.**
