

# V83: Northern Territory recognised engineering signatories

## Information Bulletin

The following engineering signatories have experience in automotive design and standards and have indicated that they are available for consultation.

They are familiar with vehicle construction/modification requirements in the Northern Territory (NT) and, for a fee, may provide advice to owners and vehicle constructors/modifiers, undertake technical assessments and issue engineering certificates for vehicle modifications carried out in the NT.

## Interstate recognition

The NT will recognise (for assessment) certification that is provided by an interstate engineering signatory provided that signatory is already recognised or approved in their home State or Territory by the relevant motor vehicle registration authority at the time the subject certification is issued.

Availability of specific vehicle certification services are subject to consultation and confirmation with the signatory.
