Disclaimer

The data in this publication was collected by conducting a survey of businesses located in the 28 remote town boundaries. This body of work was completed in 2023 by the former Northern Territory Department of Industry, Tourism and Trade.

The collection methodology was created in accordance with Australian Bureau of Statistics data quality framework principles. Data in this publication is only reflective of those businesses reported on as operating in the town at the time of data collection (see table at the end of publication for list of businesses reported on). To comply with privacy legislation or where appropriate, some data in this publication may have been adjusted and will not reflect the actual data reported by businesses. As a result of this, combined with certain data not being reported by some businesses, some components may not add to totals. Changes over time may also reflect change in business propensity to report on certain data items rather than actual changes over time. Total figures have generally not been adjusted. Caution is advised when interpreting the comparisons made to the earlier 2011, 2014 and 2017 publications as the businesses identified and reported on and the corresponding jobs may differ between publications. The surveys have not always gathered data on training and jobs in the same years.

Notes for each table and chart are ordered alphabetically and listed at the end of the publication.

REMOTE TOWNS JOBS PROFILE ALI CURUNG

Introduction

This jobs profile provides a snapshot of jobs and the characteristics of job holders in Ali Curung as at September 2023. Trends from the surveys conducted in 2011, 2014, and 2017 are also described. Additionally, it presents data on Community Development Program activity, Population, and Vocational Education and Training.

This jobs profile is one of 28 profiles developed for remote towns in the Northern Territory. It is anticipated these and subsequent profiles will contribute to a robust evidence base to inform decision making in and relating to these Territory towns.

This profile contains information collected by the Northern Territory Northern Territory - Department of Industry, Tourism and Trade from businesses operating within the town and is supplemented by other administrative data sets and information.

Each profile provides up-to-date information that is intended to inform the planning and design of current and future government programs and as an evidence base to inform decision making relating to workforce development, enterprise and job opportunities.

The profile may best be understood as a point-in-time tool. The number of business surveys from which the data was drawn is significantly less than in earlier surveys, and business participation has decreased with each survey. For Ali Curung, 25% fewer businesses than in 2017 are reported here.

The data collection methodology and corresponding questionnaire were created in partnership with the Australian Bureau of Statistics (ABS) and in accordance with ABS data quality framework and survey principles.

The Northern Territory - Department of Industry, Tourism and Trades' Territory Engagement and Delivery, Skills Initiative and VET data teams collaborated with the Northern Institute at Charles Darwin University to facilitate the surveys and reports.

The information collected and reported on represents a significant goodwill investment by those businesses and organisations that participated. Each business is listed at the end of this publication.

Summary

The 2023 jobs profile was developed based on responses from 9 businesses operating within the Ali Curung town boundary, three less than in the 2017 survey. Of these, there were:

- 4 businesses from the private sector, accounting for 32 filled jobs or 73% of total filled jobs
- 5 businesses from the public sector, accounting for 12 filled jobs or 27% of total filled jobs
- 5 businesses participated in all four surveys (completed in 2011, 2014, 2017 and 2023).

A total of 65 filled and vacant jobs in Ali Curung were reported, a decrease of 32 jobs from 2017.¹

The 2023 profile highlights:

- there were 44 filled jobs of which:
 - 30 jobs (68%) were filled by Aboriginal people, a decrease of 18 jobs from 2017
 - 14 jobs (32%) were filled by non-Aboriginal people, a decrease of 15 jobs from 2017
 - 61% of employed Aboriginal people are working in the public sector
 - Aboriginal people accounted for 68% of job holders in the town compared to 62% in 2017
 - Aboriginal females made up 54% of total Aboriginal filled jobs in the town compared to 46% in 2017
- there were 21 vacant jobs, of which:
 - job vacancies as a percentage of jobs increased to 32% in 2023 from 21% in 2017
 - job vacancies equate to 1 in 3 jobs
 - 14 of the vacancies were in the Professionals and Community and Personal Service Workers areas
- Arts and Recreation Services industry was the largest industry employer in 2023, followed by Agriculture, Forestry and Fishing
- training decreased in student numbers between 2023 and 2016
- Arts, Entertainment, Sports and Recreation was the largest training activity sector with the most students, followed by General Education and Training
- Building and Construction had the highest decreases in student numbers between 2023 and 2016 of 22.

The overall population in Ali Curung decreased by 148 people (27.7%) between 2011 and 2021 to 387 people.

In comparison, the overall Northern Territory population increased by 9.7% between 2011 and 2021.

In 2021, the working age population (15 years and over) in Ali Curung was an estimated 261 people compared to 351 in 2011, a decrease of 25.6%.

There were 0.2 jobs in Ali Curung per working age person compared to 0.3 jobs per person across the 28 remote towns in the Northern Territory.

¹ The number of filled jobs does not represent numbers of people as a person may have several jobs or one job may be shared by more than one person.

Vocational Education and Training

Note: The 2010 data is in accordance with the new, standardised reporting procedures that focus on all training activities conducted in the remote town, irrespective of funding source, as compared to earlier publications. As a result, the 2010 VET data values in this publication might not match those in earlier publications.

The impact of the Remote Jobs and Communities Program (RJCP), established in 2013, has played a significant role in the reduction of accredited training in many remote towns across the Territory.

Note: Business names captured across the four survey periods have been identified by the Australian Business Number name listed as at 2023

In 2023 in Ali Curung there were:

- 9 businesses reported on, of which:
 - 5 businesses were from the public sector (56%)
 - 4 businesses were from the private sector (44%)
- 3 business operating that were not operating in 2017.

Notes

- (a) These counts represent numbers of filled jobs and not the number of people. As such the totals represent the total number of filled jobs, not the total number of employees. This count is not directly comparable to the total number of employed people as a person may have several jobs or one job may be shared by more than one person.
- (b) Full-time is defined as a job usually requiring 35 hours or more per week or that required 35 hours or more work during the reference week. Part-time is defined as a job usually requiring less than 35 hours per week or that required less than 35 hours work during the reference week. The reference week refers to the period that respondents were asked to provide information about. In most instances it would be the week prior to the week the questionnaire was completed. Questionnaires were predominantly conducted in June and July.
- (c) Care needs to be taken when analysing the counts of filled jobs by Aboriginal people. Aboriginality was reported by the business representative completing the questionnaire.
- (d) Sector was classified using the Standard Economic Sector of Classifications of Australia (SESCA), 2008.
- (e) Job permanency is classified according to what the business believes the level of job permanency is based on guidelines provided by data collectors. Those guidelines state a permanent job has paid annual and/or sick leave entitlements while a temporary job includes casual and fixed-term contract jobs.
- (f) Classified according to the Australian and New Zealand Standard Classification of Occupations (ANZSCO), 2006, major occupation level.
- (g) Other Occupations include jobs where occupation was not stated, not known or inadequately described.
- (h) Classified using the Australian and New Zealand Standard Industrial Classification (ANZSIC), 2006, division level.
- (i) Care needs to be taken when analysing the counts of filled jobs by the gender of people in the jobs. The gender of the person employed in a job is reported by the business representative completing the questionnaire.
- (j) Care needs to be taken when analysing the counts of filled jobs by the age of people in the jobs. The age of the person employed in a job is reported by the business representative completing the questionnaire.
- (k) Students represent the number of individual clients that enrolled in a Vocational Education and Training unit during the calendar year.
- (l) Unit enrolments represent the count of individual units that students enrolled in during the calendar year.
- (m) Nominal hours delivered is the sum of the nominal hours of the units commenced during the calendar year regardless of when the course enrolment commenced.
- (n) Unit completions are the count of all successfully completed units reported in the calendar year regardless of the year of commencement of the units.
- (o) The Community Development Program (CDP) supports job seekers in remote Australia to build skills, address barriers and contribute to their communities through a range of flexible activities. Under the CDP, job seekers with activity requirements are expected to do up to 25 hours per week of work-like activities that benefit their community. It should be noted that some CDP participants may be reported on within the profile if they are attached to a filled position with an employer captured in the survey. Due to confidentiality issues, data below 20 people is not published.
- (p) Population estimates for both 2011 and 2021 are taken from the estimated resident population (ERP) data produced by the Australian Bureau of Statistics (ABS) and based on Australian Statistical Geography Standard (ASGS) Statistical Area Level 1 (SA1) regions. ERP are official estimates of the Australian population, which link people to a place of usual residence with Australia. All ERP data sources, including the Census of Population and Housing (Census), are subject to error (including inaccuracies in collection, recording and processing data) and should be used with caution.
- (q) Indigenous population proportions, unemployment and workforce participation rates are based on ABS Census counts at ASGS Indigenous Locations (ILOCs) for each remote town.
- (r) Working-age population includes all residents aged 15 years and over (commonly referred to as the civilian population) and consists of people that are employed, unemployed or not in the labour force.
- (s) A 'business' has been defined as any organisation that has undertaken productive activities in the last year, including companies, non-profit organisations, government departments and enterprises operating within the designated remote geography (town), and has one or more employees in paid employment and an Australian Business Number (ABN).
