Safety: It's Your Responsibility

Safety should be your first priority when walking the Larapinta Trail. Careful planning, having the right supplies, plenty of water and knowing your limits are the keys to a trouble free walk.

- Do not attempt long walks in hot weather (generally November to March, but can also occur either side of these months). Take warm clothing, a sleeping bag and shelter if you are camping during the freezing winter nights.
- Consider your health and fitness carefully before walking any part of the Trail. Know your limits and have an emergency plan. Allow for flexibility in case of unseasonably hot weather.
- Walk with at least two others so that an injured person is not left alone. Carry some form of emergency communication such as a satellite phone or personal locator beacon (PLB).
- Arrange return transport before you depart. Walkers should leave details of their walk plan with a reliable person. Ensure they know to contact police if you don't return by the pre-arranged time.
- Fill out the logbooks provided at every Trailhead so that Rangers can track your movements in an emergency.
