1 Introduction

This document describes the Procurement Rules outlining the mandatory requirements, exemptions, exceptions and process options for all Northern Territory Government (NTG) agencies and their personnel when undertaking procurement activities.

Section 11.1 of the Procurement Act provides for the Minister responsible for Procurement to 'issue directions with respect to the principles, practices and procedures to be observed in the procurement of supplies by and on behalf of the Territory and Agencies'. The Minister responsible for Procurement has issued two documents that form these directions:

1. Procurement Governance Policy
2. Procurement Rules (this document)

The Procurement Governance Policy describes the Procurement Framework which includes the Procurement Principles, Procurement Lifecycle approach, Procurement Governance Model and terminology that governs and guides NTG procurement activities.

In addition to the directions issued by the Minister responsible for Procurement, Procurement Circulars are issued from time to time by the Agency responsible for procurement policy, providing further guidance to be observed by agencies.

The Rules should be read in conjunction with the Procurement Governance Policy and current Procurement Circulars to ensure agencies are compliant in the conduct of their procurement activities.
2 Components of the Procurement Rules

The Rules consists of four components:

1. **Procurement Principles** (Section 3) – these are the core values that guide the interpretation and implementation of the Rules to achieve the desired outcomes, irrespective of the value and risk.

2. **Procurement Lifecycle** (Section 4) – outlines the key stages of the procurement process, providing a context for the Rules.

3. **Procurement Rules** (Section 5) – these describe the mandatory requirements that agencies must (should by exception) follow when undertaking procurement activities.

4. **Procurement Rules Exceptions and Exemptions** (Section 6) – provides limited exceptions and exemptions from specific rule requirements that may be approved where their use is defensible.

Definitions of terms used within the Rules can be found in the *Procurement Governance Policy*. 
### 3 Procurement Principles

The five Procurement Principles that must be applied to every procurement activity, irrespective of value and risk, are summarised below.

For further information about behaviours associated with each principle, refer to the *Procurement Governance Policy*.

<td>Procurement activities instil confidence in business, industry and the public as to the probity, accountability and efficacy of NTG Procurement Framework.</td>
</tr>
<tr>
<td><strong>3. OPEN AND EFFECTIVE COMPETITION</strong></td>
<td>Procurement activities foster a competitive and innovative business environment to drive opportunities for the NT.</td>

</tr>
<tr>
<td><strong>5. ENVIRONMENTAL PROTECTION</strong></td>
<td>Procurement activities promote the protection of the environment through harm minimisation and sustainable practices.</td>
</tr>

4 Procurement Lifecycle

The Procurement Lifecycle has three stages and accompanying activities as shown in Figure 1 below:

- **Planning** – agency strategic procurement planning, defining specific procurement needs and planning specific procurement approaches.
- **Sourcing** – the process of inviting businesses and industry to submit offers, and the steps associated with assessing, negotiating and awarding contracts.
- **Contract Management** – systematically and effectively managing contract establishment, execution and closure, including a review of contractor performance and the recording of lessons learnt.

For further information about the activities at each stage of the Procurement Lifecycle, refer to the *Procurement Governance Policy*.

5 Procurement Rules

Procurement Rules are requirements for agencies and their personnel when undertaking procurement activities. Although compliance with the Procurement Rules is compulsory, the Rules allow discretion in many instances, providing a level of flexibility that is essential across the diverse range of business needs of NTG agencies.

Where the Rules use the term ‘must’, the Rule is mandatory and non-compliance is a breach.

Where the Rules use the term ‘should’, this indicates that careful consideration of factors relevant to each activity is required.

Agencies must observe the role and responsibilities of the following authorities to ensure compliance with the Procurement Rules:

- Where the Rules use the term ‘Accountable Officer’, the approval of that action rests solely with the person fulfilling the role or duties of the Chief Executive (or equivalent) and cannot be further delegated.
- Where the rules use the term ‘Delegate’, that action may be approved by the Accountable Officer or an authorised delegate of the Accountable Officer.

Procurement Rules are structured to align with the three stages of the Procurement Lifecycle, with the addition of General Rules and a Supplementary Rule Detail Table.

The Procurement Rules must be read in conjunction with the Procurement Governance Policy and current Procurement Circulars to ensure agencies are compliant in the conduct of their procurement activities.
5.1 General Rules

Rule 1. Governance and Accountability

1.1 Procurement Circulars may be issued by the Agency responsible for procurement policy from time to time, and these **must** be complied with by NTG agencies.

1.2 The **Accountable Officer** should establish procurement delegations for their agency that considers appropriate segregation of duties.

1.3 The **Accountable Officer** may establish additional procurement processes and procedures for their agency provided they are consistent with the requirements of the **Procurement Act**.

1.5 The agency and its personnel **must** ensure that all procurement recommendations, decisions and actions are defensible.

1.6 The **Accountable Officer** **must** establish an internal audit program for their agency that incorporates the requirements of the Value for Territory Assurance Program.

1.7 If requested by the Agency responsible for procurement policy or the Buy Local Industry Advocate, the **Accountable Officer** **must** provide full details of requested procurement activities.

‘Defensible’ means:

Defensible means based on proper consideration of the situation and information available at the time (including information that is reasonable to obtain), free from real or perceived bias, and procedurally fair.
