

Mining Management Plans/Authorisations

Q1: 1 July to 30 September 2023

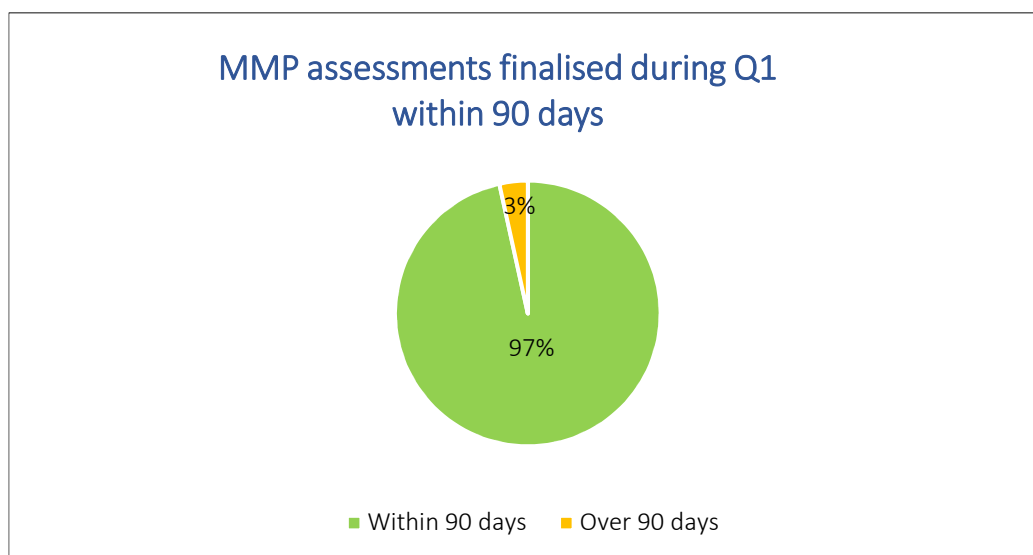

Mining Operations Unit is responsible for assessing Mining Management Plans (MMP) submitted under the *Mining Management Act 2001* for exploration, extractive mineral and mine projects.

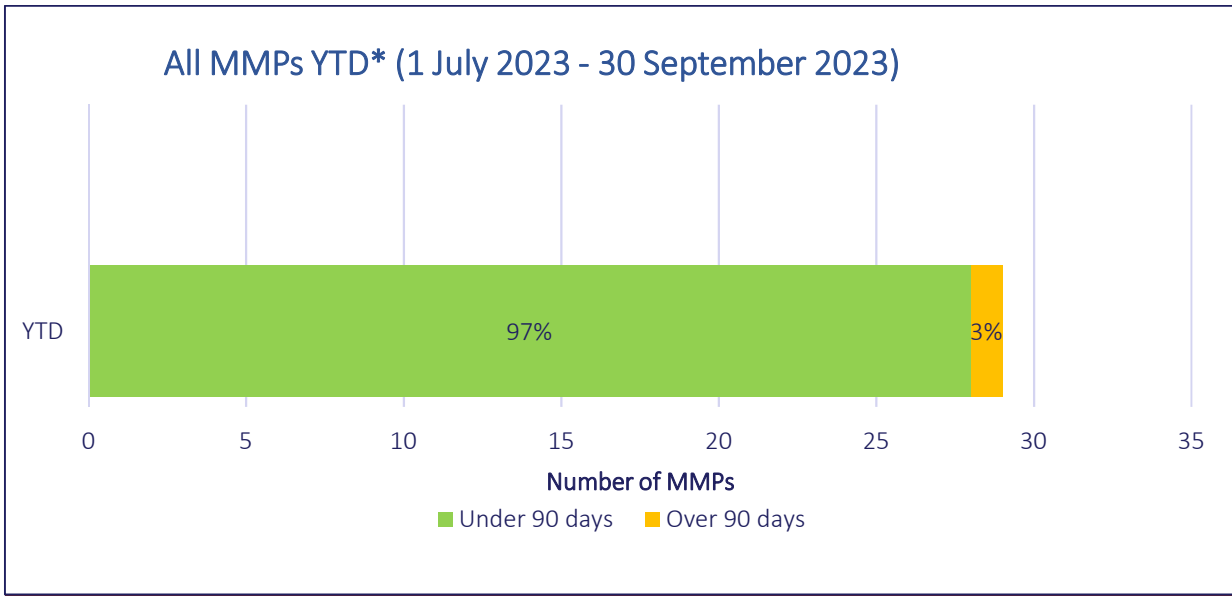

To increase transparency around decision timeframes and level of activity, quarterly reports are made available showing the number of MMPs submitted under the *Mining Management Act 2001* for exploration, extractive mineral and mine projects and the time taken to finalise assessment and the making of a decision on approval. Assessments may result in a new authorisation or a variation to an existing authorisation.

Key Performance Indicator Results

KPI: 85% of all MMPs submitted assessed within 90 calendar days

Reported numbers are determined based on the decision date falling within the reporting period. Assessment time is calculated from submission date to decision date.

MMPs approved and Authorisations issued in reporting period

Activity Type	New projects authorised	Existing projects varied
Exploration	7	14
Extractive mineral	2	-
Mining	1	4
Total	10	18
