

Report of a decision of a registered adjudicator

Determination No 52.17.02

Section 54(1) *Construction Contracts (Security of Payments) Act*

On 30 May 2017, a decision (No 52.17.02) was made by Gordon Smith, an adjudicator registered under the *Construction Contracts (Security of Payments) Act*.

Because the contents of the decision could identify the parties involved, I have determined that those contents will not be published.

The application was dismissed because the adjudicator found that the applicant's payment claim was not issued on the date required under the contract and was therefore invalid. As a consequence there was no payment claim and without a payment claim the application could not be said to be prepared and served in accordance with section 28 of the *Construction Contracts (Security of Payments) Act*.
