BUILDING NOTE

Contact Officer: Serry Alberty

Edition Number: 31 - 8/6/2000

Update on Building Note 30 – Referencing of AS2047 (Windows) and AS1288 (Glazing and Windows)

Building Note 30 dated 16/11/1999 provided guidance in relation to the application of Australian Standards AS 2047 and AS1288. The note further advised that it was intended that at Amendment No. 7 to the BCA (to be adopted on 1 July 2000), the method of referencing the two Standards would be altered.

Since that time a number of issues in the application of the standard have been identified that need to be resolved.

Given this, the method of referencing the two standards in the BCA **has not** been included in Amendment 7.

Apart from the timing of the proposed amendments the advice provided in Building Note 30 remains unchanged.
