

Correct NLIS Device Application

The correct application of NLIS ear tags is in the off-side ear (right-hand side ear).

Correct ear tag application increases the tag's retention and reading ability of NLIS reading equipment.

NLIS devices are stamped with the NLIS logo and the words 'Do not remove'.

Cattle only need to be permanently identified once, either with an NLIS Breeder tag (white) or an NLIS Post-breeder tag (orange).

If cattle you buy are already identified with an NLIS Device, do not attach a second NLIS Device.
