BUILDING NOTE

Contact Officer: Serry Alberty

Edition Number: 32- 11/10/2000

REVISED DESIGNATED FLOOD LEVEL KATHERINE

This notice is to advise that on 10 August 2000 the NT Government declared a new revised designated flood level for Katherine.

The attached Brochure titled "Designated Flood Levels for Katherine" details the control measures and features a flood map.

The new revised flood levels are generally now lower than that of the May 1999 declared levels.

The requirement for Development Consent Authority approval for all development within the area subject to inundation in the designated flood (see brochure) remains.

The new revised levels are effective immediately for the purposes of *NT Building Act Regulation 39* Requirements in Flood Prone Areas and apply to all new buildings and new extensions to buildings.

More detailed mapping and information is available from:
