

TO THE SPANISH MACKEREL LICENSEE

Fisheries catch return data are vital to assist in the sustainable management of fisheries and stock assessments, and this data are used to make informed decisions in relation to fisheries management.

Pursuant to Section 34 of the *Fisheries Act 1988* (the Act), it is a requirement that the holder of a commercial fishing licence submits accurate catch and market returns within twenty-eight (28) days from the end of the month in which the fishing took place. The manner and form for the required return(s) is outlined, with examples, on the following pages to assist you with meeting your legal requirements.

The information on the catch and market return forms is used by Fisheries to monitor stocks and assist in the sustainable management of the fishery. The accuracy of data is, therefore, very important. The return forms request the minimum information necessary. Any additional information, such as fish size or condition that you may wish to add will be very useful.

The information you provide is CONFIDENTIAL to Fisheries, being subject to Section 36 of the *Fisheries Act 1988* and the *Information Act 2002*. Information Privacy Principles also apply to the information collected through catch and market returns.
