

NLIS for abattoirs in the NT

Cattle moving to Northern Territory Abattoirs are required to be identified with a radio frequency identification device (RFID) and the transfer must be recorded to the NLIS database.

When stock are identified with an RFID it is the responsibility of the abattoir to notify the database of the identification particulars of the RFID and the PIC of origin of the animal when it is slaughtered.

The abattoir is responsible for the transfer of any cattle off the Abattoir PIC on the NLIS database.

NT abattoirs / meatworks

PIC	Property Name / Holding	Region
